

Test benches for electric motors

WEKA performance test stand – complete system - type LPS

- air cooled eddy current brake
- height-adjustable clamping plate
- articulated shaft coupling
- transportable
- Installation without foundation possible.

„RE-POWER“ Version:

- mit AC/DC Generator und electronic feedback technology
- customized production

WEKA performance brakes – type MT

- air-cooled
- eddy current brake, oscillating stored in the machine housing
- with torque and rotational speed measurement technology
- 9 sizes for power ratings from 0.1 kW (MT5) to 450 kW (MT500)

Special test stand construction

we gladly manufacture special test stands according to the customer's requirements

Construction year 2017.
